

**DynamicsDownloads** is a revolutionary new site that allows customers & partners to view, purchase and download SL add-on solutions.

Those who have developed a custom application, screen or report have the opportunity to upload their solution to the Dynamics Download portal for others to see and purchase.

This program provides great visibility and ease of getting solutions to market. Go to [www.DynamicsDownloads.com](http://www.DynamicsDownloads.com) to register and select your membership level!

The DynamicsDownloads portal is also home to the Dynamics SL User Group. Members have access to information presented at user group events; non-members can purchase these materials or sign up for a user group membership on this site as well.

***Best of all, a trial 90-day membership is also being offered for a limited time. Sign up today!***
