

[BENEFITS]

Manage accounts more effectively

If you entered a PA batch with incorrect information and released it into Dynamics™ SL, Project Controller Eraser will make it easy to remove the entry so that you can re-enter it.

Save time and money

PA Eraser saves you from having to enter adjusting entries to remove the incorrect batch or items in the system.

Process your information easily

Simply erase the original batch or items, and then enter the correct information. Erased document information is stored in an audit file so audit trail is available.

Maintain security

PA Eraser uses Dynamics™ SL's standard security features, so access can be limited to specified users.
